

A REQUEST

We respectfully ask that the users of the electric current who have irons and motors refrain from using them in the evening or night when the current is needed for lights. When an iron or motor is started it will dim the lights on the line near where such is operating. Complaint has been made to us about this and it is our desire to give as good service as is possible. We hope everybody will co-operate with us to this end.

Please do your ironing and run your motors in the day time when the current is not in use for lights and it will help the service and we will appreciate it very much.

Respectfully,

it. M. F. Reed, Mgr.

When the Grand arm of the republic holds its reunion this year at Indianapolis, many who attended the encampment of 1920 will be counted among the missing, as the ranks have been depleted by nearly ten thousand since that gathering.

The total membership of the G. A. R. today is 93,155 while its membership in 1920 was 103,258.

Here's why CAMELS are the quality cigarette

BECAUSE we put the utmost quality into this one brand. Camels are as good as it's possible for skill, money and lifelong knowledge of fine tobaccos to make a cigarette.

Nothing is too good for Camels. And bear this in mind! Everything is done to make Camels the best cigarette it's possible to buy. Nothing is done simply for show.

Take the Camel package for instance. It's the most perfect packing science can devise to protect cigarettes and keep them fresh. Heavy paper—secure foil wrapping—revenue stamp to seal the fold and make the package air-tight. But there's nothing flashy about it. You'll find no extra wrappers. No frills or furbelows.

Such things do not improve the smoke any more than premiums or coupons. And remember—you must pay their extra cost or get lowered quality.

If you want the smoothest, mellowest, mildest cigarette you can imagine—and one entirely free from cigarettey aftertaste,

It's Camels for you.
